

Serial numbers on WIKA instruments

WIKA Data sheet IN 00.33

Many WIKA measuring instruments are marked with serial numbers. These are, e.g., printed on the dials (in case of pressure gauges and dial thermometers), engraved in the cases or printed on the labels.

The serial number contains all relevant instrument data (e.g. date of manufacture). Specification of the number is helpful for follow-up orders or when returning instruments for calibration.

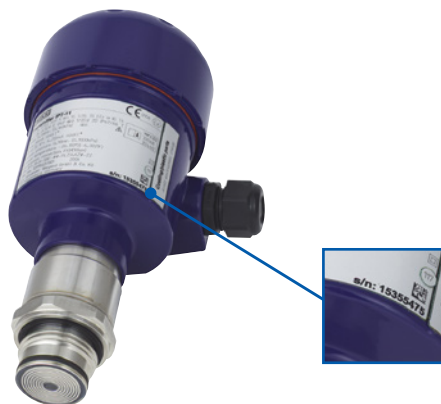

Pressure gauges and dial thermometers

Pressure transmitters

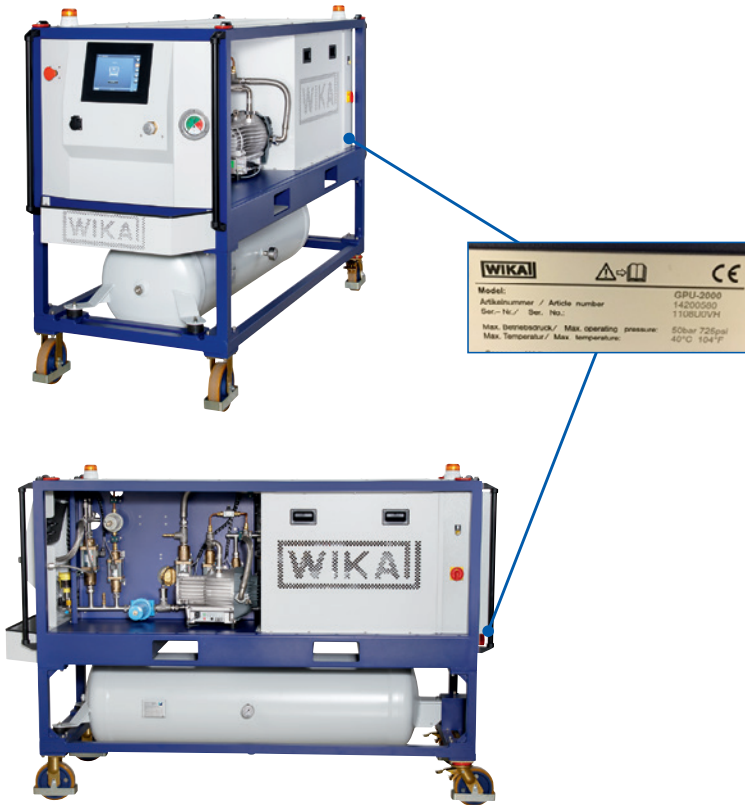

Temperature transmitters

Process transmitters

Resistance thermometers, thermocouples

Handling equipment for SF₆ gas

Analysis instrument for SF₆ gas
